SUPPORTING OPTIMAL METABOLIC HEALTH

About Unicity

As part of our mission to Make Life Better for individuals all around the globe, Unicity develops innovative nutritional products that make healthy living doable so people everywhere can enjoy a beautiful, healthy, fulfilling life.

Pillars of science

We are committed to combating the metabolic health crisis and developing products that are obsessively backed by science, developed with integrity, and produced with the highest quality and manufacturing standards.

Scientifically designed

Science is at the core of everything we do. Unicity's research and development team is constantly in pursuit of the better—working to discover new compounds, innovative ingredients, and to develop products that will improve human health. Unicity has recruited top scientists from around the world to be the driving force of our elite science team. Each scientist brings unique expertise and experience to Unicity and supports our ever-growing research and development initiatives.

Rigorously tested

From raw materials to finished goods, quality is built into our products. We work hard to build solid relationships with our ingredient suppliers and enact strict quality control measures to be sure we can stand behind our products, as well as provide a consistent product experience. We test our products on many levels to ensure we meet our high standards and provide a consistent and quality product. With NSF, cGMP, TGA, Kosher, Halal, and ISO-9001 certifications, we're not the only ones who think we're doing it right.

Masterfully produced

Many consumer-goods brands focus on developing a brand, and then outsource the bulk of their business to contractors. Unicity does things differently. We believe in overseeing everything from start to finish. That's why we've invested hundreds of millions of dollars in our product development capabilities, from facilities and equipment to testing methods to highly qualified personnel.
